

## **CITY COUNCIL of Warsaw Capital City**

**Warsaw, 4 May 2006**

**His Magnificence  
Prof Włodzimierz Kurnik  
Chancellor of Warsaw Technology University**

**Dear Sir,**

I have read with great interest an application for a project “Modelling and simulation research of an intelligent city transportation system MISTER”. As it was already expressed in the letter of the Director of the Warsaw Promotion and Development Department, Mr. T. Deszkiewicz, dated 1 March 2006, this type of solutions seem to be exceptionally interesting as the transportation systems with major benefits, among others, in terms of ecology, safety and economics. I am pleased that three faculties of Warsaw Technology University expressed an interest in researching this type of solution and applied for chancellor’s grant under the direction of prof. Włodzimierz Choromański. I hope that starting of research on MISTER system, authored by Mr. O.Mikosza, may result in latter implementation research and work. I also think that Warsaw, in case of the positive research outcome, maybe interested in this solution. For these reasons I wish to express my support for the grant application.

Best regards,

**Vice Chairman**  
CITY COUNCIL of Warsaw Capital City

Mirosław Szyber
